Flutter Developer

FIVE PACK

Overview

Their drive to learn and instinct for emerging technologies led them to immerse themselves in Flutter just nine months after version 1.0 was released. Over the last two years, they have specialized in the development of customer-facing Flutter mobile apps, launching more than five products to market including an app for an enterprise level client and an app that was featured by the App Store this month. Their speciality in Flutter development paired with their work ethic and natural orientation towards collaboration and problem solving make them an asset to every team they lead or contributes to.

Experience & Education

Flutter Developer

Five Pack • Tulsa, OK
Jul 2021 - Present

- Architect an enterprise level application against a narrow timeframe to deliver on time.
- Work closely with senior UX/UI designers to implement clean and responsive interfaces.
